

Execution System Diagnostic

4-6 weeks • Fixed fee
Senior-led • No slideware

A structured, systems-level X-ray of how decisions in your organization turn — or fail to turn — into shipped outcomes. Not an audit. Not a maturity assessment. A written diagnosis with an actionable roadmap your leadership team can act on.

THE CORE QUESTION

Where is execution breaking down in your organization, and what would actually change if you addressed it?

THREE-PHASE ENGAGEMENT STRUCTURE

Phase 1 — System Mapping

Weeks 1-2

Objective: Understand how execution actually works today — not how it is described in process documentation.

- Structured conversations with founders, CTO, CPO, VP Engineering, and selected senior ICs
- Review of current roadmap governance, delivery cadence, and decision workflows
- Architecture realism assessment (where designs and execution diverge)
- AWS and cloud execution review where applicable

Output: Execution System Map — how decisions, work, and outcomes actually flow across your organization.

Phase 2 — Bottleneck & Gap Analysis

Weeks 2-4

Objective: Identify where execution is breaking, at what layer, and with what downstream cost.

- Decision fragmentation analysis (where ownership is unclear)
- Delivery flow analysis (where throughput slows or breaks)
- Architecture-execution gap assessment (where design and reality diverge)
- AWS modernization readiness review (if applicable)

Output: Bottleneck Map — prioritized structural execution gaps with root cause analysis.

Phase 3 — Intervention Roadmap

Weeks 4-6

Objective: Translate the diagnosis into a clear, pragmatic plan of what to change — and in what sequence.

- Prioritized intervention design and sequencing recommendations
- Resource and organizational implications
- Clear recommendation on whether Agilocrats is the right partner for interventions

Output: 90-Day Execution Reset Roadmap — a written plan your leadership team can act on, with or without Agilocrats.

Deliverables

All owned by you

- Written Execution System Diagnosis Report (20–35 pages)
- Visual Execution System Map of your organization
- Prioritized Bottleneck and Intervention Map
- 90-Day Execution Reset Roadmap with recommended sequencing
- Leadership debrief session presented directly to your executive team
- 30 days of follow-up availability after close

Commercial Structure

Fixed fee · No daily rates

- **Fixed fee.** No daily rates. No time-and-materials billing.
- **Scoped in writing.** Deliverables, timeline, and access requirements defined upfront.
- **Mid-engagement checkpoint.** At the two-week mark, you may stop with no penalty.
- Roughly 30–40% of Diagnostics do not lead to further engagement. That is by design.
